tieto

“

“High stress levels”

“Difficult to recruit personal”

“Aging workforce”

“Patient wait time
constantly increasing”

”

“

“I spend in average more than 20 percent of my time searching for equipment, colleagues, patients and rooms”

”

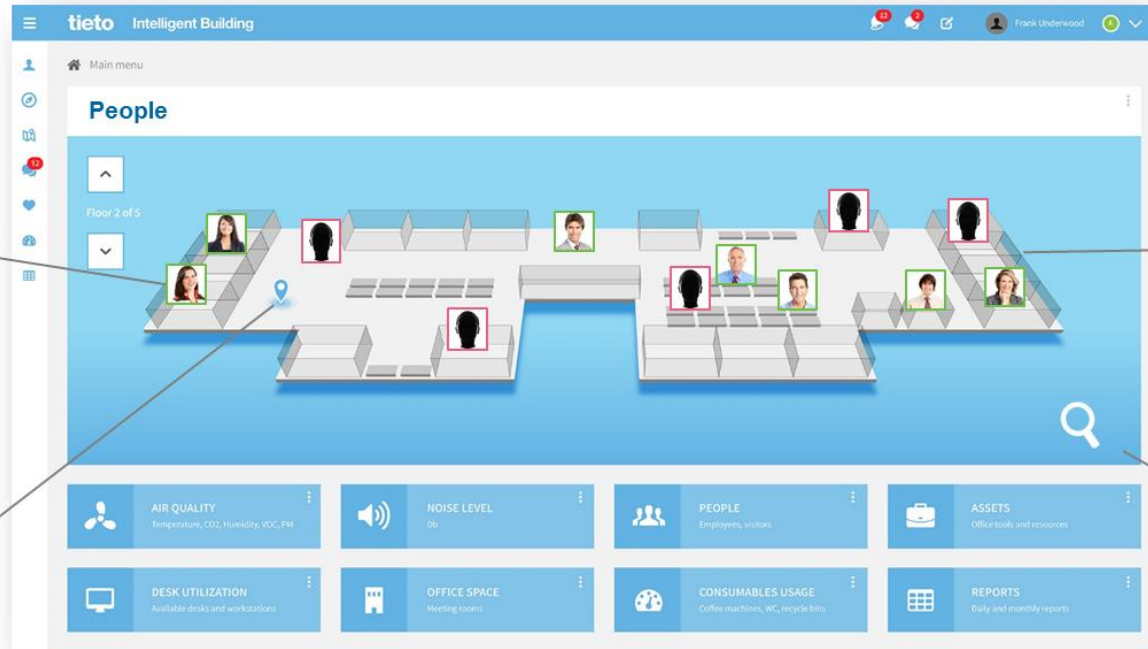

The Intelligent Hospital solution enables finding, tracing and matching people and rooms...

Liisa Virtanen
Nurse
Ready for tasks

3 doctors
7 nurses
45 patients 5. floor

Your location

Find colleagues

... as well as assets and events

The screenshot displays the Tieto Intelligent Building dashboard. At the top, it shows the user's name 'Frank Underwood' and a notification icon. The main area is titled 'Assets' and shows a 3D floor plan of 'Floor 2 of 5' with several blue circular markers indicating asset locations. Below the floor plan is a dashboard with several monitoring panels: 'AIR QUALITY' (Temperature, CO2, Humidity, VOC, PM), 'NOISE LEVEL' (db), 'PEOPLE' (Employees, visitors), 'DESK UTILIZATION' (Available desks and workstations), 'OFFICE SPACE' (Meeting rooms), 'CONSUMABLES USAGE', and 'REPORTS'. Two callout boxes at the bottom right show '12 automatic beds available' and '0 wheelchairs available'. Three callout boxes are connected to the dashboard: one on the left for 'Ultrasound In use at the moment' (with an ultrasound machine image), one on the right for 'EKG -device Previous user Jack' (with an EKG monitor image and a user profile picture), and one on the left for 'Events with location' (with a warning triangle icon).

12 automatic beds
available

0 wheelchairs available

Value proposition

Save one day a week!

Less time spent on looking for equipment,
unoccupied rooms, patients and personnel

Optimize and plan!

Where are the bottle necks?
Do we have enough EKG-machines?
Do we use rooms the optimal way?

Together we strive to
improve your business
using disruptive
technologies,
for today and
the future.
